Dear Mr. Gamble:

Re: Permit Transfer Requests, Ideal Basic Industries, Inc. & Hofi North America, Inc., Devil's Slide Cement Plant & Quarry, and Poverty Point Limestone Quarry, M/029/001 & M/045/012, Morgan and Tooele Counties, Utah

The Division has received and reviewed your recent applications for permit transfers of Ideal Basic Industries, Inc. (Ideal) mining operations to Hofi North America, Inc. (Holnam, Inc.). The Devil's Slide and Poverty Point operations are being transferred to Holnam, Inc. as part of a merger of Ideal into the parent company (Holnam).

Before we can proceed further with the permit transfers for these two mining operations, the Division will need supplemental information from both companies to complete the transfer and approval process. The required information is as follows:

1. Enclosed you will find two (2) Transfer of Notice of Intention, Large Mining Operations forms (FORM MR-TRL). These forms will need to be completed by both companies and returned to this Division.
2. Rule R613-004-113.4, Surety, requires that:

The operator shall submit a completed Reclamation Contract (FORM MR-RC) with the required surety.

Two copies of FORM MR-RC have also been enclosed with this letter. These forms must be completed and returned to the Division. Once complete, these Reclamation Contracts will be attached to the appropriate reclamation sureties on file for both operations.

The new surety riders have been evaluated by our bonding specialist, Pam Grubaugh-Littig. She has indicated that they appear to be in order. These will be attached to the existing surety bonds and presented to the Board of Oil, Gas & Mining at the appropriately scheduled hearing.

Please contact me or Pam Grubaugh-Littig if we can answer any questions regarding this letter or the enclosed forms. Thank you for your cooperation and understanding in completing this permitting action.

Sincerely,
